FAILURE IS NOT AN OPTION

War Fighting Science & Technology Against Infectious Diseases

Black OPS Systems LLC is a technical research and development corporation co-owned by Service Connected Disabled veterans. Our headquarter is based in the Delmarva Peninsula on the East Coast of the United States. We champion in advance medical technology innovation. We hold an active utility patent, on a state-of-the-art **full service human diagnostic testing laboratory** that specialize in providing real-time data transfer using 5G, portable service for field emergency crisis interventions, and within traditional institutional diagnostic settings.

We deliver up to 750 polymerase chain reaction (PCR) test results and susceptibility ratings for all types of infectious diseases in 15 minutes.

Our innovative technology has been approved by the Food and Drug Administration (FDA) and certified by the Clinical Laboratory Improvement Amendments (CLIA).

Our target market includes federal, state, and local governments --- not excluding private corporations throughout the United States and worldwide respectively.

Each testing system has the capacity of generating revenue up to \$300,000 per hour, or \$7,200,000 per day, or \$2,628,000,000 per year (results may vary).

We are seeking \$5,000,000 - \$100,000,000 to launch our corporation both nationally and worldwide into the annual multibillion dollars diagnostic industry, respectively.
